

Intermediate AI-Powered Blended Learning in Action

This course is designed for educators ready to elevate their instructional practices and move beyond foundational AI tools into advanced instructional design. Participants will shift from using AI as a simple productivity tool to leveraging it as a collaborative co-designer for deep differentiation.

Prerequisite: Completion of the Artificial Intelligence in Blended Learning Classrooms course or equivalent experience using generative AI tools and their application in educational settings.

DETAILS

15 CPE credits

Format: Asynchronous with opportunities for virtual collaboration

COST

\$600 per participant

Course fees qualify for reimbursement by the Texas Education Agency upon completion.

PARTICIPANTS WILL

- Design differentiated lessons using advanced AI prompting techniques.
- Create AI-supported systems that promote student independence and responsible AI use.
- Use AI to streamline planning, personalize learning, and support data-informed instruction.
- Generate assessments, rubrics, and timely formative feedback with AI.
- Build and refine an AI-enhanced blended learning experience through a hands-on capstone project.
