UTeach Blended Learning PD and Long-Term Teacher Retention Study

According to a study by the Texas Education Research Center, teachers participating in UTeach’s Blended Learning Professional Development significantly **changed their attitudes toward blended learning** and **increased their ability to use technology productively** in the classroom.

*Texas Education Research Center at The University of Texas at Austin. (June 2024). *Participation in the UTeach Blended Learning Professional Development Program and Long-Term Teacher Retention.*

Educators who complete UTeach PD courses consistently report:

- Higher levels of **student engagement**
- **Increased student ownership** and accountability
- **Improved academic achievement** and test scores
- **More on-task behavior** and smoother classroom routines
- Greater student confidence and **motivation to learn**

*Findings drawn from qualitative analysis of educator reflection papers collected from participants in the UTeach Foundations of Blended Learning course between 2023 and 2025.

100%

of district partners surveyed agree:

“The curriculum in the UTeach PD courses is both **useful and relevant to student learning.**”

“My students’ scores have improved greatly. They have been able to meet goals and show great progress!

I have also had great feedback from my administrators during walkthroughs.”
