Mastering the New Science TEKS

Grades K–2 or 3–8 course versions available!

Designed for Texas educators by Texas educators, Mastering the New Science TEKS is a self-paced course, offered in both K–2 or 3–8 versions, that equips teachers to effectively teach the new Texas science standards.

With a focus on inquiry-based teaching and personalized learning strategies, this course supports teachers as they gain a solid understanding of the new standards and expectations for mastery on the STAAR test.

COURSE OBJECTIVES

• Gain a comprehensive understanding of the new science TEKS in grades K–2 or 3–8
• Explore blended learning techniques for personalizing instruction
• Learn how to plan engaging inquiry-based lessons with any curriculum
• Create and analyze high-quality 5E lessons
• Develop a personalized action plan for your science classroom

COURSE FEATURES

• Personalized and prompt feedback on all job-embedded work products
• Access to tutorials and exemplar 5E lesson plans from current master science teachers in Texas
• Access to the UTeach PD Blended Learning Resource Library and online educator community
